

ARATHI SHEKHAR MUNAVALLI

Cybersecurity Analyst — Penetration Testing & Vulnerability Assessment

Hubli-Dharwad, Karnataka | 9380934086 | smarathism@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Final-year Computer Science Engineering student (VTU, 2027, CGPA 8.73/10) with hands-on penetration-testing and vulnerability-assessment experience — Nmap, Nikto, Burp Suite, Wireshark, and OWASP Top 10 exploitation on DVWA — validated by a live cybersecurity internship, a Google Cybersecurity Professional Certificate, and 2 independently built security tools.

Google Cybersecurity Professional Certificate • Live SQLi/XSS exploitation on DVWA, mapped to OWASP Top 10 • 50+ Wireshark packet captures analyzed • 8.73/10 CGPA

EXPERIENCE

Cybersecurity Intern — Alfido Tech

Mar 2026 – Apr 2026

- Ran full vulnerability-assessment cycles on internal test servers — port/service enumeration with Nmap, misconfiguration scans with Nikto — then manually exploited SQL injection and XSS on DVWA via Burp Suite, mapping every finding to the OWASP Top 10.
- Isolated anomalous traffic across 50+ Wireshark packet captures and compiled forensic incident reports by correlating Windows Event Logs with live scan activity, sharpening root-cause triage speed.

SQL Intern — SystemTron

Sep 2025 – Oct 2025

- Normalized multi-table schemas to 3NF and locked down data integrity with 10+ stored procedures and triggers, reducing query exposure and cutting query time by ~30%.
- Audited existing queries for injection-prone patterns and rewrote them as parameterized stored procedures, closing a class of SQL injection risk at the schema level.

PROJECTS

CyberShield — AI-Powered Cyber Threat Detection | [GitHub](#) | [Live Demo](#)

Mar 2026

HTML, CSS, JavaScript, Node.js, Python

- Engineered a real-time detection pipeline that flags phishing URLs and suspicious domains, auto-scoring each into Safe, Suspicious, or Dangerous tiers.
- Designed a modular threat-detection architecture — domain-reputation checks, a risk-scoring engine, and a results dashboard as separate layers — and deployed it live on Render.

Secure Login — Brute-Force Detection System | [GitHub](#)

2026

Python, Tkinter, Winsound

- Built a login GUI with brute-force detection that locks the account after 5 failed attempts, logs every attempt to a security log file, and triggers a sound alert on lockout.
- Implemented a persistent, timestamped audit trail of every login attempt, giving a clear forensic record for post-incident review.

SkillBridge — Hyperlocal Skill Marketplace | [GitHub](#) | [Live Demo](#)

Mar 2026

HTML, CSS, JavaScript

- Led a 5-member team to build a zero-commission marketplace platform; placed 23rd of 887 teams at YUVA i-Cause 2026 (National).
- Owned the frontend build and coordinated task delegation across the team to hit the hackathon submission deadline.

TECHNICAL SKILLS

Security: Nmap, Nikto, Wireshark, Burp Suite, OWASP Top 10, DVWA, XSS/SQLi

Languages: Python, Java, JavaScript, SQL

Systems & Web: Linux, Windows Event Logs, Node.js, REST APIs, MySQL, MongoDB

Tools: Git, GitHub, VS Code

EDUCATION

B.E. Computer Science & Engineering

2023 – Present | CGPA: 8.73/10

AGM Rural College of Engineering & Technology (AGMRCET), Varur — VTU

Pre-University (XII), Science (PCMCS)

2021 – 2023 | 93%

KSSS PU Science & Commerce College, Hubli

CERTIFICATIONS & TRAINING

- Google Cybersecurity Professional Certificate — Foundations, Play It Safe, Connect & Protect, Tools of the Trade, Assets/Threats/Vulnerabilities
- Introduction to Cybersecurity — Cisco
- Deloitte Australia Cyber Job Simulation — Forage
- NPTEL (IIT Madras): Cloud Computing, Python for Data Science, Programming in Java
- Agamy Tech Summit 2026 — Cybersecurity & Technology Workshop, Agamy Cyber Tech, SGBIT Belagavi (29–30 Aug 2026)

ACHIEVEMENTS & EXTRACURRICULAR

- Internshala Student Partner (ISP 58)
- She Plus Tech Initiative member
- Volunteer — SRISHTI 2026 (SDM College, Dharwad) and HackFusion 2.0 (AGMRCET)
